CELEBRATING 100 YEARS

of Public Transport in Bexhill

RENAULT

In the space of three short years, just over 100 years ago, two companies were formed, who were later to find their respective paths crossing with one of today's greatest interests - the motor car, or, to be more specific, the Renault.

Coincidence perhaps, but certainly one which Mr. Louis Russell would not have foreseen when he established his first garage in Bexhill in 1896, or Mr. Louis Renault could have anticipated when he built his first car in a small garden shed, but one which has since proved to be of considerable benefit and satisfaction to motorists in the East Sussex area.

CHAIRMAN'S MESSAGE 'WELCOME TO THE BBX 2001'

Hello,

Welcome to the BBX 2001. I hope you get a great deal of pleasure from your visit to Bexhill. Whilst every effort will be made to ensure you enjoy yourselves today, we hope you will bear with us if a few minor hiccups occur.

The E.S.T.P.G. has been involved in preservation for many years, but this is the first time a Rally/Running day has been attempted and where better to start than to Celebrate 100 Years of Public Service Vehicles in Bexhill, which hopefully may be the first of many.

I hope you enjoy riding on the vehicles involved in the services, all we ask, is that you treat them as you would your own property, because many hours of blood, sweat and tears have gone into restoration, to keep them on the road for your continued enjoyment.

I wish to thank everybody who has helped to make this event possible, including all members of the committee without who's assistance, this could not have taken place.

May I appeal to you to support our cause with donations. All excess funds generated by this event will be used to ensure the future of vehicles currently operated by our group. Also, to make possible the future acquisition and preservation of other vehicles that have connections with the East Sussex area.

We hope you all have a nice day.

Geoff Yarnell Chairman E.S.T.P.G Organising Committee.

CAN YOU HELP? VOLUNTEERS WANTED

If you have a flare for old transport and have a few hours spare at weekend the E.S.T.P.G. would welcome you to join their friendly team of existing volunteers. Even if your skill level is very basic, you will be taught how to handle jobs efficiently and safely by a qualified member of the team. If you have skills in Welding, Metalwork, Mechanical, Carpentry, Electrical, Plumbing or Painting or just have a keen enthusiasm and want to learn, you will be most welcome.

Membership costs £10 per year to join a fast growing preservation Group that always has a project in hand so you will never be bored. You can travel with the us to Rally's around the South and see other preserved vehicles at rest and at work.

Our aim is to keep yesterday's transport on the road for the enjoyment of others.

Our motto stands firm, we are 'Breathing life back into yesterday's transport'.

If you feel you are able to assist in any way, or would like further information, or just want an informed chat, please contact:

Mr D Pollard - E.S.T.P.G. - 01424 435483

EAST SUSSEX TRANSPORT PRESERVATION GROUP

AN INTRODUCTION TO OUR GROUP

Although our name may not be familiar to most people in the preservation scene in this area, we have been in existence since 1989 when our first vehicle was obtained. This has since been restored to full working order, and our ex Maidstone & District AEC Reliance YKR 224 is now well known on the rally scene in this area.

We have just completed our second major restoration project an ex Maidstone & District PD2 NKT 875. We feel that we have achieved a reasonable level of success for a small group, and the time has come to take a more prominent role in the preservation movement and publicise our activities more widely.

We would like to attract new members to our group so that we can increase our capacity to raise funds, not only to secure the future of our current vehicles but also to enlarge our workforce to be able to take on more projects in the future.

There are still vehicles out there that require saving before the great scrap yard in the sky calls them in, these inevitably will require a lot of time and effort on the part of the volunteer workers to return these vehicles to full working condition.

The fruits of your labour and time finally come to life when you see the vehicle that you have become to love after so long (just like a second marriage).

The vehicle that you have strived with, hated, kicked to death, sworn at, cut your hands, knocked your head, got smothered in oil, a most relaxing hobby, but after all that - a fully restored and painted bus about to go onto the road after years of hiding in some wood, barn or even scrap yard; what can be more pleasing than to see all your efforts now placed before the public eye. (I said the public eye not the London Eye!). Knowing full well that that vehicle would not be here if it weren't for your efforts.

If you feel that you can contribute to this cause in anyway, we would like to hear from you. It is not necessary to be an expert in any aspect of preservation; we only ask that you show dedication and are willing to learn. We would also like to hear from experts as well! There are still things that we can all learn.

If enough support is forth coming in the future by way of finance and volunteer labour, who knows what level of success could be achieved; perhaps some form of transport museum for this area could be the outcome? The area is sadly lacking in this department.

If you are interested, you can contact us on (01424) 436803 or 435483.

E. S. T. P. G. The only way forward.

History of NKT 875

Bus Celebrates its 50th birthday

NKT 875 is a Leyland PD2/12 with Leyland's own highbridge body which seats 58 people, built in 1951 and supplied to the Maidstone & District Motor Services in May of that year. Numbered DH379 in the Companies fleet and was numerically the first of 41 such vehicles operated by them. Unlike most of the other vehicles of this type in the fleet 379 was one of the few buses to retain its open rear platform, the others had electric folding doors fitted.

379 had 17 years of revenue earning service, operating from Tunbridge Wells, Sittingbourne, and Ashford Depots before being withdrawn in 1968. But the vehicles career with the Maidstone & District did not end there; as it was then converted in to a driver trainer vehicle renumbered 701 (later P1) and used by the Company for a further 9 years. 1977 saw the sale of 701 to a dealer, who then resold it to the "Wallace Driving School" in Nottingham, it was then used for a further 5 years as a driver trainer by that Company.

1982 the vehicle was purchased for preservation by Mr. R. Coombes of Tenterden, who kept it until it was purchased by the current owner in 1995.

The vehicle was in a poor state structurally, so extensive repairs and restoration were carried out by the members of the East Sussex Transport Preservation Group. It is hoped that DH379 will be restored to on the road condition by May 2001 in time for its 50th Birthday.

Celebrating 100 Years of Motor Bus Transport

BEXHILL MUSEUM EXHIBITION - JUNE TO DECEMBER 2001

I have had an interest in buses from early childhood. commencing, as far as I can remember, from a visit to the Festival of Britain in 1951 with my father, who encouraged me to sit in a simulated bus drivers cabin. It was not long before I began to take an interest in buses, which has continued throughout my life. From that initial experience in a driver's cabin, there followed regular visits to numerous bus garages throughout the length and breadth of the country, culminating in several experiences as a real life bus driver. My connection with Bexhill buses began when as a young child, I visited my great grandfather who had a bungalow in Ninfield Road, near Sidley and a mounting fascination with the former Maidstone & District buses almost developed into a love affair.

Years later whilst attending the Bexhill 100 weekend, I had the good fortune to meet Julian Porter, Curator of Bexhill Museum who, upon learning of my fascination with buses, suggested I might like to be involved with an exhibition centreing around the History of Bexhill Buses. This was too good an opportunity to miss, particularly when I discovered Bexhill was one of the early pioneers of bus transport.

Much work and effort has gone into the BBX 2001 which I am sure you will all enjoy and I hope you visit the special exhibition at Bexhill Museum which is open the same time as the main museum except **Sunday 8th July 2000 - Open all day.**

**February to December, Tuesday to Friday 10.00am to 5.00pm,
Saturdays, Sundays, Bank Holidays 2.00pm to 5.00pm.**

Small admission charge, accompanied children free.

BBX 2001

***WE HOPE TO RUN SPECIAL EXCURSION TRIPS
FROM THE 'DOWN' SHOW GROUND.***

***ALL TRIPS WILL BE FREE BUT BY TICKET ONLY,
AVAILABLE FROM THE CONTROL BUS AT THE MAIN GATE.***

IMPORTANT INFORMATION ON EXCURSION TRIPS.

Depending on the availability of suitable vehicles, we are hoping to run some excursion trips around the Bexhill and Hastings area.

Details and times of these trips will be available from the Control Bus situated at the Main Gate of the Showground on the day of the event.

All trips are free, but by ticket only as there will be a limit to the number of people that can be carried on certain vehicles.

Look out for information on excursion trips, on the chalk-board by the Control Bus, tickets will strictly be issued on a first come first served basis as and when the trips are advertised. No tickets will be issued in advance to such advertising.

We apologise for the uncertainty of the trips but we are governed by what vehicles will be available on the day. Restrictions are still in force up and down the country with regards to the 'Foot and Mouth disease' whereby many buses are still trapped and not able to attend our event, so please bear with us as we try our hardest to see what can be done.

Every effort will be made to ensure that trips are run, but we cannot be held responsible if some are cancelled at the last moment due to circumstances beyond our control.

All trips leave from and return to the 'Down' show ground,
There will be no pick up or drop off points other than the 'Down' show ground.
The duration of all trips will be approximately 1 hour.

Only a limited amount of tickets are available for each trip; there will not be a repeat.
In the event of a person losing their ticket a replacement can not be issued.

If a ticket holder is not at the departure point when the bus is scheduled to leave, the bus will depart without that person or persons.

***PLEASE REMEMBER ALL EXCURSIONS ARE FREE, BUT BY TICKET ONLY
AVAILABLE FROM THE CONTROL BUS BY MAIN GATES ON THE DOWNS***

BUS TIME TABLE

FREE RALLY BUS SERVICE TIMETABLE

Service will run, London Road, Town Hall Square, Buckhurst Road, Bexhill Old Town, Bexhill Railway Station, Cantelupe Road, Seafront (Miramar and Mermaid Tavern Fayre), Bexhill Marina, De La Warr Pavilion, West Parade Clock Tower (for Museum), (Return via Egerton Road), Brockley Road, Cooden Drive, Cooden Beach Jarvis Hotel.

| 26 Trevor Meakins | Leyland Leopard | 1961 2726 CD |
| Harrington bodied touring coach, these vehicles were once the pride of the Southdown Fleet. | | |

Oh for a home we can call our own!

Our recent difficulties in finding a home for our latest preservation project highlights the need for a road transport centre in the East Sussex area.

There are several other vehicles with local connections that need saving for the future before they are lost for ever. As the cost of purchasing most of them is just scrap value, the only obstacle is finding a safe, secure storage area where these vehicles can be kept and worked on and eventually put on public display.

Some groups in the South East have managed to start these projects: The Dover Transport Museum and the Amberley Chalk Pits Museum are the nearest to Hastings, both sites having successful track records in making it work. It can be done with a little help?

We are therefore taking the 'bull by the horns' to start the ball rolling, as we are not the only group to have trouble finding permanent homes for old vehicles. It would be in other groups interest to cooperate together in trying to make an 'East Sussex Transport Museum' a reality.

Other organisations in preservation movements in this area will be contacted to gauge the amount of support for such a venture. Plans are in motion for an open public meeting for anyone interested in putting forward their own ideas on the subject.

A site dedicated to the preservation and restoration of yesterdays transport has got to be good for everybody concerned, not just the older generation, but to encourage younger people into the hobby and thus create a new generation of preservationists to ensure the future of historic vehicles. The educational advantages are endless as young people could be encouraged to learn skills of the past to use into the future for everyone's benefit.

As a starting point for the 'East Sussex Transport Museum', is there a sympathetic landowner who has a spare site of little commercial use, whereby the rent was within our budget?

If you have ideas or views on the subject contact Geoff on Hastings 436803 *evenings only*. We as a group are willing to listen to any propositions.

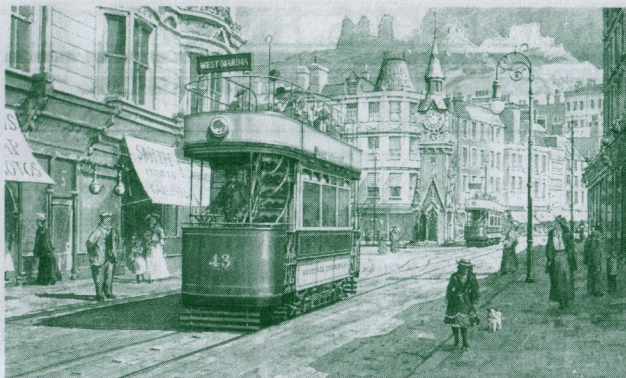

The category of old vehicles does not stop at old buses but includes lorries cars motor cycles etc., the list is endless. **So climb aboard and help us in the formation of an 'East Sussex Transport Museum'.**

Classic Cars Entered for the Event

Entry Name/Group, Vehicle Entered and Brief History

- | | | | |
|---|---|-------------|-----------------|
| 1 Ron Fellows | Jaguar Mark 2 | 1966 | FRD 542D |
| Acquired in 1976 used everyday for first 10 years, has been fully restored, with present owner for last 24 years. | | | |
| 2 Vic Truluck | BSA sports 3 wheeler | 1935 | BNC 587 |
| Made in 1953 and fully restored to present condition. | | | |
| 3 Bob Bennett | Morris 8 Series 'E' | 1947 | GSK 786 |
| No History file available | | | |

TRAMS ON THE SOUTH COAST

SOUTH EASTERN TRAMWAY SOCIETY

Hastings, St. Leonard's & Bexhill Electric Tramway 1905-1929

It was 1905 when the first electric tramcars appeared within these coastal towns. There were sixty five open top four wheel tramcars in brown and cream livery, bearing the name Hastings Tramways. Thus begun a new era of travel for the people of these towns which helped make the trams popular and successful.

The area the trams covered was from Hastings and the borders of Ore Village, The Ridge, Baldslow, Silverhill, Hollington, St. Leonard's Sea Front, West St. Leonard's, Bulverhythe, Bexhill Road, Pebsham, De La Warr Road, Bexhill Central Station, Bexhill Devonshire Road, Metropole Hotel (now De La Warr Pavilion), Egerton Park, Polegrove, Cooden - all these places could therefore be reached by tramcar.

Over the years, wear and tear took their toll on the trams and no new trams were obtained to replace them. Their days were numbered when the Trolley Vehicle Act of July 1927 authorised their replacement by trolley vehicles. Subsequently, in the earlier part of 1929 the last tramcar trundled into its depot.

THE TRAMS OF HASTINGS, ST. LEONARD'S & BEXHILL THE CLUB - SOUTH EASTERN TRAMWAY SOCIETY

Hastings Tramway Club (HTC) was formed in 1992 to create an interest in the history of trams which formed a major part of the transport scene. HTC went on to become involved with other tramway enthusiasts and societies and have held several exhibitions and shows since they began.

We have been successful in returning three ex Hastings tramcar bodies. No 43 from Dover museum. The bulkhead has been retained as a reminder of that car, but the rest has since been mostly dismantled to use as spare parts for the other two bodies Nos 48 & 56. After only a few months, No 56 was made presentable and shown at the Oval for the first time since the demise of the tramway network in 1929 and the event celebrated 90 years since trams first appeared in Hastings in 1905.

Our interests spread to new ideas in trams and tramway systems including the idea of Hastings Tramway Development Company for a tramway along the seafront of Hastings Old Town.

We are interested in developing a site for a museum to house our present tram bodies plus various other items that have been collected. In 1927 we changed our name to South East Tramway Society (SETS), to encourage individuals from a wider area with similar interests to join us.

TROLLEYBUS HISTORY

Happy Harold is a 1928 trolley-bus with a Christopher Dodson double deck open top body on a Guy BTX six wheel chassis, both rear axles are powered.

Purpose-built open-top trolley-buses are extremely rare and Happy Harold is a unique survivor of a batch of only eight built for the Hastings Tramways Company, the only open top trolleybuses ever built in the whole world! These vehicles would have run principally along Hastings seafront and occasionally into Bexhill.

Happy Harold survived because it was used as a works car during the war when the other seven were scrapped and re-emerged in 1953 bedecked with lights to celebrate the Coronation.

It was the lead vehicle in the final trolleybus parade on June 1st 1959; after that the original electric motor was removed and a Commer TS3 diesel engine and gearbox were fitted, and the vehicle continued in service as an attraction until the late 1960's

BBX 2001 COLOURING COMPETITION SPONSORED

BY THE E.S.T.P.G., & BEXHILL OBSERVER

To help the celebrations, the E.S.T.P.G., joined forces with Bexhill & Hastings Observer newspapers for a competition aimed at Primary school age children. All local schools in these areas were asked to draw and colour a picture of a double-decker bus. The colouring mediums were completely optional, but the use of computer graphic design was strictly out as the competition was primarily designed to expand the imagination of the child, (and many of them achieved just that). The competition in general gave a good response with some wonderful imaginative entries. These should be viewed by major bus companies as one particular entry was drawn with comfort in mind - the bus was some 6 storey's high, had a minimum of 40 wheels each side and the driver sat on the top floor with a good view ahead!

All entries were judged by a panel consisting of a member from the E.S.T.P.G., Bexhill Observer and Bexhill Museum Association. The Mayor of Bexhill and the Bexhill Observer newspaper will award prizes for the best entries in the two age groups at the event on the 8th July. Prizes include Lego building sets, books and book tokens, colouring sets, etc. May we thank everybody who took part in this competition and for schools that put in time to see this venture through. It posed an immense task to sort through hundreds of entries to classify the best drawing from a very high standard entered. A decision was finally reached. Winning entries will be displayed in the Bexhill Museum for the length of their bus memorabilia exhibition, June 30th - December 17th 2001 and also on the Control Bus on 8th July. Congratulations to those who won prizes, and thank you to all who took the trouble and effort to enter. **E.S.T.P.G.**

YKR 224 is an A.E.C Reliance with a Beadle 42 seat body built in 1957, it was primarily intended for one man operation, as this was the start of the one man bus era. The 224 has a 6 cylinder A.E.C 470 7.7 litre Diesel engine and a vacuum breaking system, chassis type MU3RV. The body was built by Beadles of Dartford, and is the sole survivor of only 18 vehicles of this type ever built by that company. It was known as the Beadle "Chatham" body, 17 of these buses were supplied to the Maidstone & District Bus Co. in 1957, the other vehicle being used as a demonstrator and is believed to have finished its life in Belfast! YKR 224 adopted the fleet number of SO224, and spent most of its operational life in the Faversham area of Kent. It was the last of its class to be withdrawn in 1971. It then had several private owners including a church and a fruit farmer before going through a series of unsuccessful preservation attempts and being discovered by its present owner in a farm building near Maidstone in Kent. Due to its derelict condition when purchased, extensive restoration has been carried out restoring it to working order. It was put back on the road in 1995.
